

## DESIGN, ENGINEERING & MANUFACTURING SUPPORT SERVICES

Advanced Materials & Technology Services (AMTS) provides design, engineering and manufacturing support services to industries including aerospace, energy, electronics and oil & gas.

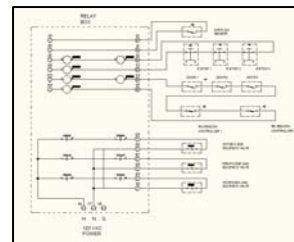

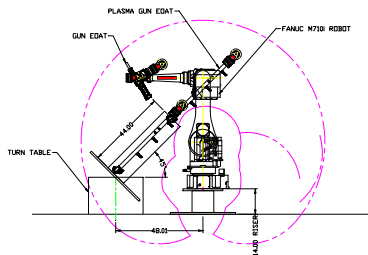

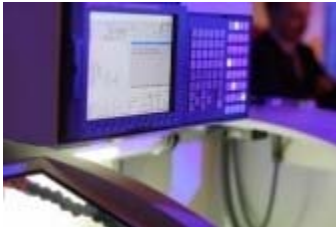

### DESIGN SERVICES

Design services are provided from component to systems design:

- Component Design
  - Systems Design
  - Cell Design
- Concept Through Final Design  
Computer Aided Design (CAD)  
Design Trade-Off Studies

### ENGINEERING SERVICES

Engineering services include:

- Mechanical Engineering
  - Materials Engineering
  - Systems Integration
- Specification Development  
Prototype Design  
Test & Evaluation

### PROCESS DEVELOPMENT & MANUFACTURING SERVICES

Process development and manufacturing support services are provided:

- Process Development
  - Automation & Cell Design
- Supply Chain Management  
Quality Engineering
